# Brain Power Secret of Sardinia's Super Agers Identified by Scientists

**Stanford scientists stunned after it boosts memory recall 44% and gives subjects brain power like people 12 years younger**

## Thanks for investing in Natura Zest!

You're now on the path towards feeling more energized... vibrant... and full of youthful zest in daily life.

But before we ship out our order...

There's something important we'd like to ask you...

Because if you often experience brain fog... mood swings... and embarrassing mental slip ups...

The latest research suggests it could be due to deterioration of the brain's 'neural mesh'.

Luckily, the secret to gaining a sharp... focused... and alert brain was recently uncovered in the tiny town of Seulo.

Seulo is located on the sun drenched Italian island of Sardinia.

And it's home to a higher concentration of 'Super Agers' than anywhere else on Earth.(1)

**Because despite being in their 70s, 80s, and beyond...**

The people of Seulo continue to enjoy full, active lives.

Many still grow their own vegetables...

Others kick back in the afternoons with a few glasses of red wine...

While many more meet daily in the town's piazza square...

**To share the latest gossip, to laugh, and to act years younger than their calendar age.**

Take Caterina Moi, 97 (*who prefers to go by her nickname 'Lelina'*).

The people of Seulo enjoy alert brains and active lifestyles long into their golden years

## She's Close to 100 But Still Lives on Her Own, and Can Recount Past Memories Clear as Day

Lelina is no exception.

Throughout the town of Seulo you'll find 'Super Agers' just like her.

**People who continue to run their own affairs...**

**Enjoy romantic relationships...**

**And fiercely maintain their independence.**

While many people their age are so foggy brained... mentally drained... and forgetful...

They struggle to read their book for more than 20 minutes straight...

Need help to order the groceries...

Or are so confused by life that all they can do is wile away the hours watching TV.

So what's their secret?

## Why Do the Super Agers of Seulo Get to Enjoy Such Remarkably Sharp Brains?

Is it Sardinian red wine? Olive oil?

Or lucky genetics?

Sure, these are all factors...

**But trail blazing research by a pioneering brain scientist has revealed another stunning reason.**

A reason that explains why not just the Super Agers of Seulo...

But many people across Italy get to enjoy:

Crystal clear memories of childhood birthdays, their first car, and first kiss

The speed of thought to engage in fast paced conversations and to tell jokes

The mental energy and alertness to travel and get in new adventures

The even better news that **this discovery hasn't been left buried in some little known journal.**

Because the brain power secret of the 'Super Agers' of Seulo has been turned into a daily morning ritual.

## A Ritual Countless Thousands of People Now Do Each Morning to Feel the Most Mentally Alert in Years

Thanks to this ritual...

People in their 60s, 70s, and beyond can feel sharp as a tack...

More present and *'with it'*...

**And to feel they have the mental energy to...**

Paint...

To learn the piano....

To play chess with the grandkids...

And to delight friends at dinner parties with their irrepressible charm and wit.

And it gets better...

Because this ritual doesn't involve an impossible to follow diet...

Risky surgery...

Or even having to step foot in a doctor's office.

But instead...

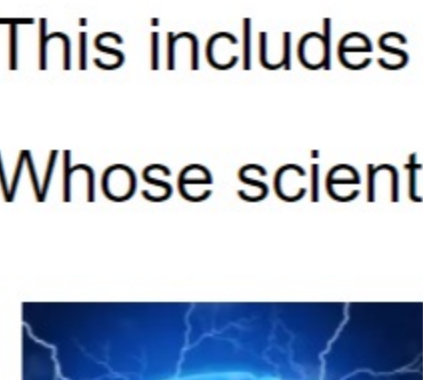

## A Fatty Nutrient Found Inside the Brains of Cows

This fatty nutrient has been the subject of over 60 human clinical studies by some of America's most respected research institutions.

This includes Stanford University.

Whose scientists were left stunned after this fatty nutrient helped subjects:

→ **Improve memory recall up to 44 percent**

→ **Boost mental clarity and speed of thought up to 33 percent**

→ **Gain the brain performance scores of people 12 years younger(2)**

In fact, the results were so impressive...

The Stanford's scientists went on record to say this fatty nutrient is *"by far the best of all the nutritional supplements we have ever tested for Age-Associated Memory Impairment."*(3)

While world leading cell biologist Dr. Parris Kidd hailed it as...

## "The single best nutrient for safely conserving and restoring crucial higher functions for the brain."(4)

Feeling sharp, focused, and alert is now within grasp

So if you yearn to up your mental game...

**To stop stumbling and tripping over your words...**

But instead to find it easier to remember what you wanted to say in an instant...

To feel more on the ball...

**Able to calculate the bills and fill in complicated paperwork with ease...**

And to have the mental energy to play Bridge...

Travel to Europe...

Or learn Spanish...

**This could be the brain health breakthrough you've been looking for.**

Because thanks to new understandings of how the brain ages...

And the discovery of this remarkable fatty nutrient...

**Enjoying peak brain power in your golden years is no longer just the stuff of science fiction movies.**

It's now science FACT.

Because for the first time in history...

And with the help of one simple daily ritual...
